Automatic setup via Home Assistant Cloud

- The cloud component set up. Learn more
- Have Cloud component Google Assistant support enabled. This can be done on the Cloud page inside Home Assistant.
- A Google Assistant enabled device like the Google Home or a mobile phone running Google Assistant.
- Activated the Home Assistant
- Smart Home skill for Google Assistant.
    - If you have a Google Home device, use the Google Home app, select the plus icon in the upper left corner, and then *Set up device*, and then *Works with Google*. Then search for *Home Assistant Cloud by Nabu Casa* and add it.
    - If you only have a mobile phone, launch Google Assistant, select the three dots menu. Under *Settings* you'll find *Home Control*. There you can add *Home Assistant Cloud by Nabu Casa* using the *Add devices* option.
